CARRER SUMMARY

ComputerScience & Engineering student specializing in AI Engineering and Full-Stack Development. Experienced in building production-style systems low-latency real-time pipelines, LLM-integrated backends, and event-driven architectures using Python, TypeScript, Next.js, FastAPI, and TensorFlow. Strong foundation in Data Structures & Algorithms, OOP, and DBMS; seeking an internship in Full-Stack, Backend, or AI Engineering.

TECHNICAL SKILLS

- **Languages& CoreFundamentals:** C++, Python, JavaScript, TypeScript, Data Structures & Algorithms (DSA),Object-Oriented Programming (OOPs)
- **AI & Machine Learning Engineering:** TensorFlow, Keras, PyTorch, Scikit-Learn, Convolutional Neural Networks (CNN), Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG)
- **Frontend & UI Engineering:** React, Next.js, Tailwind CSS, Shadcn UI, Responsive UI Design
- **Backend, Databases & Cloud:** FastAPI, Node.js, Express, MongoDB, Firebase, Prisma ORM, REST APIs
- **Workflows & DevOps Tools:** Inngest (Event-Driven Queues), Qdrant (Vector DB), Git, GitHub, Docker, Vercel

RELEVANT PROJECTS

Intervo – Real-Time Voice AI Interview Platform (April–May 2026) **live | github**

TechStack:Next.js,TypeScript, FastAPI, VapiSDK (WebSockets), Gemini3 Flash, Firebase , Vercel

- Architected a low-latency (<800ms round-trip) voice interview pipeline using Vapi WebSockets for bidirectional real-time audio streaming between candidate and AI agent.
- Engineered serverless FastAPI webhook handlers orchestrating Gemini 3 Flash for context-aware, adaptive question generation based on prior candidate responses.
- Built an automated evaluation pipeline scoring interview transcripts against role-specific rubrics, with results persisted in Firebase Firestore for post-interview review.

CNN Image Classifier – Emotion Detection (March 2025) **github**

Tech Stack: Python, TensorFlow, Keras, Matplotlib

- Designed a custom CNN architecture (4 convolutional blocks + dropout regularization) in TensorFlow/Keras, achieving 91% validation accuracy on a 7-class facial emotion dataset.
- Reduced overfitting by ~12% through data augmentation and batch normalization; visualized training/validation curves and confusion matrices with Matplotlib.

Twitter Sentiment Analysis (Sept 2025) **github**

TechStack:Python,NLP(VADER/TF-IDF), Tweepy/Twitter API, Matplotlib

- Built an end-to-end sentiment analysis pipeline processing 10K+ tweets on trending topics via the Twitter API, using NLP techniques to classify sentiment with ~85% accuracy.
- Deployed a real-time dashboard visualizing sentiment trends and topic-level insights using Matplotlib.

EDUCATION

B.Tech in Computer Science & Engineering

Guru Nanak Institute of Technology, Sodepur

Aug 2023 – Aug 2027 | CGPA: 8.6 (Expected Graduation: Aug 2027)

CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification – Stanford Online & DeepLearning.AI (Instructor: Andrew Ng) • Python for Everybody Specialization – University of Michigan (Coursera)
- Deloitte Data Analytics Virtual Experience – Forage Job Simulation
